

CORPORATE PROFILE

We believe that research and development is the key to bringing innovative pharmaceutical solutions to the global community. Rest assured, at Bio-Labs, we will always be in the pursuit of bringing quality products to the masses of the world.

Our aim is to lead the therapeutic remedies available to the patients of the world through development of new medicines δ pharmaceutical preparations.

Corporate social responsibility is at the heart of our organization. We undertake several CSR initiatives to give back to our community. We believe that giving back to the community and our next generation is the way forward and our CSR initiatives shall continue with the same spirit and zeal.

USMAN SHAUKAT Managing Director

Upon establishment in 1989, Bio-Labs had envisioned a self-dependant Pakistan producing superior quality medicines and vaccines to promote animal health across the country. Since then our Animal Health Division has vigorously working towards this goal and today our vision is a reality as we pride ourselves on being one of the leading animal vaccine and pharmaceutical manufacturers in Pakistan. In 2005, a state of the art manufacturing facility was set-up to manufacture and market pharmaceutical formulations for human therapeutic use. It included solid and liquid oral dosage forms (tablets, capsules, syrup, suspensions and dry powder), topical products (Cream, Ointment, Lotions and Gels) and injections (Sterile liquid vials, sterile liquid ampoules, sterile dry powder and sterile lyophilized powders).

Mission

Our mission is to be a company of high quality standards, committed to medical ethics and patient satisfaction with environmental and social consciousness while embracing innovation, change and development.

At Bio-Labs we have always believed in continuous R&D towards the development of newer pharmaceutical formulations. Our new product development program generally includes pre-formulation studies, excipient compatibility studies, analytical methods development and validation, formulation development and optimization, formal stability studies, and manufacturing process development. We also have a quality program dedicated to continuous improvement of product quality of running products.

Manufacturing Expertise

Today Bio-Labs is manufacturing over 200 pharmaceutical products including pharma, veterinary & biological products and is living up to the vision of A Comprehensive Health Care Company. Operations at Bio-Labs are based on the most modern and meticulous techniques and our manufacturing facility is constructed on the pretext of controlling cross contaminations, ensuring smooth flow of personnel and materials, provisioning optimum environment and assuring worker welfare and safety. Our state of the art manufacturing facility is a depiction of our progressive vision. Having a state of the art HVAC system, we guarantee the best possible environment for our workers and ultimately our products. The HVAC system was designed according to cGMP regulations and production requirements. The system was validated by an independent engineering company and Ministry of Health-Pakistan. Our manufacturing equipment has one virtue in common, which is eminence. Technical staff at Bio- Labs is well versed with contemporary manufacturing techniques and boasts impressive experience of technical operations. Summing all these virtues the outcome can only be a flawless product.

Specialized Products

We strive to develop specialized products particularly in the field of biological products. We are proud to be one of the selected few manufacturers in Pakistan manufacturing poultry & livestock vaccines as well as lyophilized powders for injection for human use. Bio-Labs stayed true to its commitment to provide quality healthcare. COVID-19 was a pandemic of this century with an ever evolving situation in terms of disease understanding and development of the treatment options. Bio-Labs was effectively able to make treatment drug Remdesivir injection (RIVONA) accessible to patients nationally and internationally and it has been recognized by IQVIA Switzerland in its recent reports (MAT Q4, 2020 & MAT Q1, 2021).

Quality Control & Quality Assurance

Our manufacturing site has the latest analytical instruments in our quality control department. We monitor quality assurance through standard systems that ensure the consistent quality of our products. A highly qualified and trained team of scientists, pharmacists, chemists and engineers work in our Research & Development and Operations departments, developing new products in an environment that celebrates continuous improvement in quality.

Our marketing philosophy is to offer quality products that are bioequivalent to the originator, at prices that are affordable to a diverse cross-section of the community, with a focus on scientific information dissemination. Being socially responsible and adding value to the medical community is an integral part of our philosophy. The product portfolio which is selected, expanded and renewed according to new trends in medical treatments consists of research based products and branded generics under various therapeutic categories. Our company's innovative marketing strategies together with its strong marketing base have helped our products to be significantly positioned in their respective therapeutic areas.

Prime example of the remarkable commitment of Bio-Labs' marketing excellence is the success of RIVONA (Remdesivir) – RIVONA won laurels of country's best new launch of the year 2020 & ranked as top selling brand of Pakistan among a plethora of products launched during this period as per recent reports of IOVIA Switzerland (MAT Q1, 2021).

Global Presence

Our aim is to create a major role for the company with regards to the development and sales of pharmaceuticals not only in Pakistan but on the international markets as well. Our export presence in Myanmar, Sri Lanka, Kenya, Cambodia, Vietnam, Philippines, Uzbekistan, Afghanistan, Egypt, Yemen, Saudi Arabia, Nigeria, West Africa, Moldova, Nepal, Oman, Mongolia, Venezuela, Lebanon, USA etc. is beginning of this aim.

Certifications & Awards

Our manufacturing facility is ISO 9001: 2015, ISO 14001: 2015 & ISO 45001: 2018 certified by TUV Austria which stands No. 1 in ranking of PNAC (Accreditation Authority of Pakistan).

TUV Austria is operating in more than 60 countries providing to their clients with wide-ranging technical inspection expertise and access to thousands of skilled specialist worldwide. Our GMP compliant Manufacturing Plant has been recognized by Drug Regulatory Authority of PAKISTAN (DRAP) in addition to being licensed by International regulatory authorities such as Pharmacy and Poisons Board (PPB) Kenya, Saudi Arabia, Vietnam, Cambodia, Nigeria, Afghanistan, Ministry of Health Yemen and the most prestigious FDA (Food and Drug Administration) Philippines.

The certificate issued by FDA, Philippines is a result of thorough inspection carried out by their inspectors on stringent PIC/S (Pharmaceutical Inspection Convention and Pharmaceutical Inspection Co-operation Scheme) guidelines.

We are one of the selected few manufacturers in Pakistan having PIC/S qualification.

Philanthropy

Corporate giving is at the heart of our organization. Vibrant communities consist of healthy individuals. We are committed to making a positive difference in the communities in which we operate. Through charity and outreach, we spread awareness and bring relief where it is needed most.

In 2019, Bio-Labs reached another milestone when it laid the foundations of Bio-Next Pharmaceuticals, a subsidiary of Bio-Labs. This state-of-the-art facility is also located in Islamabad, and specializes in manufacturing of life-saving hightech injectable antibiotics including Carbapenems.

A dedicated facility for CARBAPENEMS

After Bio-Next Pharmaceuticals in 2021, yet another addition of Bio-Labs Consumer Health became functional. A latest high quality manufacturing facility to meet the needs of rapidly emerging market of Nutraceutical / Consumer Health products. Bio-Labs Consumer Health is devoted to create wellness with excellence and innovation through extensive research and development in varity of healthcare segments. We aim to continue providing patients / consumers the products that are in their reach and beneficial for their health and quality of life. This specialized nutraceutical facility is separately producing products and food supplements for both human and veterinary consumption.

Human Nutraceuticals

Veterinary Nutraceuticals

At ZH Therapeutics, we believe good health is the foundation of vibrant lives, thriving communities and forward progress. That's why our aim is to keep people well at every age and every stage of life. We strive to improve access and affordability, create healthier communities, and put a healthy mind, body and environment within reach of everyone, everywhere.

ZH Therapeutics, a sister concern of Bio-Labs, is the only Pakistani company to get its hand sanitizer products approved with the US FDA, and is the only Pakistan based brand of hand sanitizer being marketed extensively in the United States.

Our sanitizers are also being marketed domestically with the highest public satisfaction.

With the blend of science, hard work and professionalism we are on the continuous work to save the world.

ZH Therapeutics manufactures several personal hygiene products for today's consumer needs.

SUNLOCE 60 Sunblock Lotion

The only Pakistan based Hand Sanitizer brand available and marketed in the United States.

Sector E-7, Margalla Road, Islamabad - Pakistan,

The CSR project entails renovation, landscaping and beautification of over 80,000 square feet of Gulistan-e-Fatima park and fountain area for the city residents. It involves plantation of 100,000 + trees and flowers along with facilities such as jogging tracks, kids play area and dedicated recreation spaces. More than 50 Ambassadors & Ministers have planted a sapling in Gulistan-e-Fatima Park as a memorandum an contribution towards Bio-Labs' environmental preservation efforts leading to its inclusion in Government of Pakistan's Billion Tree Tsunami Project. Bio-Labs aims to give back to the community to promote healthy activities & contribute to the environment through the clean & green initiative.

The Courtyard Cafe Federal Government Services Hospital (Polyclinic) Islamabad

The Courtyard Cafe developed, built and decorated by Bio-Labs in Federal Government Services Hospital, (Polyclinic) Islamabad. The Courtyard Cafe is Bio-Labs' way of providing homage and hospitality to the relentless efforts of doctors and paramedic staff in keeping us safe especially during the Covid-19 Pandemic period. Understanding the immense psychological and physical stress through which our medical warriors go through and to provide a respite during their hectic duty to the nation. Bio-Labs pledges to remain at the forefront steadfastly with the medical community through thick and thin.

Business Partnerships

Our goal is to create new business opportunities with reliable collaborators and strengthen our portfolio both in existing and targeted markets by the establishment of new business units, companies and joint ventures.

In order to expand our presence in local and international markets, we are open to communicating with international and local companies for successful collaborations and discussing all types of activities. Our state of the art machinery allows us to meet extravagant production demands in a timely manner and thus enabling our partners to achieve the eminence they desire in today's competitive healthcare industry.
